

Roll No.

BCA-602(N)

**B. C. A. (Sixth Semester)
EXAMINATION, May, 2018**

(New Course)

Paper Second

**INFORMATION SYSTEM ANALYSIS DESIGN AND
IMPLEMENTATION**

Time : Three Hours] [Maximum Marks : 75

Note : Attempt questions from all Sections as directed.

Inst. : The candidates are required to answer only in serial order. If there are many parts of a question, answer them in continuation.

Section—A

(Short Answer Type Questions)

Note : All questions are compulsory. Each question carries 3 marks.

1. (A) What are the requirements of a good coding scheme ?
- (B) What do you understand by the term polymorphism in an object-oriented system ?
- (C) What is the difference between a physical and a logical DFD ?

(B-52) P. T. O.

[2]

BCA-602(N)

- (D) What are standards ? Explain the ISO standards.
- (E) What is the purpose of a data validation program ?
- (F) What is the difference between a class and an object ?
- (G) Explain user interface prototyping with example.
- (H) Why should a systems analyst be able to communicate well ?
- (I) Why is feasibility analysis necessary before designing a system ?

Section—B

(Long Answer Type Questions)

Note : Attempt any *two* questions. Each question carries 12 marks.

2. What is data dictionary ? Explain the steps of creating data dictionary. <http://csjmuonline.com>
3. What is structures walkthrough ? Explain the process of structured walkthrough.
4. Explain the feasibility study. What are the different types of feasibility studies ?
5. What is ERD ? Make an ERD for university enrolment.

Section—C

(Long Answer Type Questions)

Note : Attempt any *two* questions. Each question carries 12 marks.

6. Define the use of CASE tools in the analysis, design and implementation of information system.

(B-52)

7. (a) What is fact findings ? How to do fact finding ?
(b) Explain the code reviews and its types.
8. (a) Explain the cost estimation and its different approaches.
(b) Give a brief requirements specification for bus ticket reservation system. Model it using objects.
9. A university has the following rules for a student to qualify for a degree with Physics as the main subject and Mathematics as the subsidiary :
- (i) Marks should be 50% or more in Physics and 40% or more in Mathematics.
 - (ii) If marks in Physics are less than 50% then marks in Mathematics must be 50% or more. However Physics marks must be at least 40%.
 - (iii) If marks in Mathematics are less than 40% but those in physics are 60% or more then only examination in Mathematics has to be repeated.
 - (iv) In all other cases the student fails.
- Write the above process using :
- (a) Structured English
 - (b) A decision table.
